# Drought Angels

Supporting our Aussie Farmers

## OUR VISION

Our vision is to ensure our Australian Agricultural Industry is sustainable, preserved and thriving for the benefit of everybody

# OUR MISSION

It is our Mission to “provide direct and timely financial assistance, essential resources and meaningful relief for Primary Producers across Australia impacted by drought and natural disasters.

Our commitment is to provide heartfelt, discrete and personalized support to farmers and rural communities.”

## Who are Drought Angels?

Established in 2014, Drought Angels is a charity with the enviable reputation of being recognised for our genuine heartfelt connection to and support of primary producers across Australia, in their time of need.

## How do we assist?

Drought Angels provides financial assistance, hampers & care packs and personalised support to thousands of farming families across Australia. This is a testament to the generosity of the Australian public who have enabled a significantly positive impact on the lives of those in need, but the fact remains, the battle against the drought & natural disasters is far from over.

At Drought Angels we pride ourselves on the supports we offer. Being the first charity to provide pre-paid Visa's back in 2014, we are also able to help sustain the economy within the local towns.

## What makes us different?

The benefits of our personalized direct financial support are:

- Immediate access to funds
- Delivered through the reliable Visa platform
- Efficient delivery of funds
- The money circulates around town, supporting the entire community
- Every dollar spent in a rural community goes around approximately 6-7 times
- The farmer knows his/her greatest priorities and can spend the money accordingly with pre-paid Visa cards.
- Discreet - our cards look like an everyday keycard for privacy.

We pride ourselves on delivering heartfelt and individualised support. We have specialist support staff tasked to work directly with families experiencing circumstances of desperation, fear and often anger...our team are on the frontline of this crisis.

Nothing is ever too big or too small and we certainly hear the common phrase “There are others worse off” all too often. At Drought Angels we as a team remain a united front in standing by our Primary Producers. We understand the effects and time it takes to recover hence our catch phrase “We won't forget you”.
